Michael Chill Jewellery Store- Activity Highlight

In E Block some of the girls wanted to design their own jewellery, so we purchased the polymer clay and some jewellery attachments and began planning. After a little bit of designing, it was time to begin bringing our ideas to life! The girls carefully selected their desired colours and began moulding the clay into different shapes. Some suggestions were passed between each other, and the final results were great! We made some fabulous French fry rings, earth shaped earrings (complete with continents), a little turtle ring and some Cinderella shoe shaped earrings to complete the order.

The children sent them off to be baked in the oven so they were solid and durable and I'm sure they will be seen in this year's Michael Hill catalogue!

Kumihimo Activity

Recently, the children at Wilston Kids Care have been learning a new Japanese style of bracelet weaving skill called Kumihimo. It starts out looking like a jellyfish and then turns into a cool chain linked weaved pattern that could be used as a lanyard or a bracelet. The children were able to choose their own colour pallets for their design and once they got started, they weren't able to stop.
